

PROFESSIONAL SUMMARY

Results-driven Data Scientist and Data Engineer with 5+ years of experience building end-to-end data pipelines and machine learning solutions, delivering actionable insights through advanced analytics. Expert in ETL processes, data warehousing, and business intelligence tools. Proven ability to turn raw data into strategic assets for business decision-making. Strong background in statistical modeling and data mining. Applied these skills to solve real-world problems.

TECHNICAL SKILLS

Data Engineering & ETL Pipelines | Python (Pandas, NumPy, Scikit-learn) | Machine Learning & Statistical Modeling | Power BI & Data Visualization | SQL & Database Management | Big Data Technologies | SAS Analytics | Data Mining | Predictive Analytics | NLP & Retrieval-Augmented Generation (RAG) | Data Warehousing | Dashboard Development | Feature Engineering | Model Evaluation & Optimization | Data Cleaning & Preprocessing | Business Intelligence | Workflow Automation | API Integration | Linux & Server Administration | Cloud & Analytics Infrastructure

PROFESSIONAL EXPERIENCE

September 2021 - Present

Autorité de Régulation du Transport Intérieur
(Chef de Service) Head of R&D – Lead Data Scientist

- Lead data scientist in national transport regulatory projects focused on data-driven policy making and digital transformation initiatives.
- Designed and implemented data pipelines for national transport database KPIs.
- Built a RAG system for fast regulatory text search and legal information retrieval.
- Applied machine learning and data mining to analyze legal and regulatory texts.
- Developed a data extraction agent in C# to collect and centralize data from regulated institutions to the regulator.
- Developed BI modules integrated into mission and stock management applications to improve reporting and support decision-making.
- Developed a monitoring dashboard to track data uploads from agents, providing insights on contributors, uploaded data size, and statistical summaries of incoming data.
- Developed and maintained executive dashboards using Power BI.
- Led a cross-functional team of statisticians and engineers.
- Represented the organization in Germany to attract public transport investors.

Technologies

Python, React (NextJs), Vue (NuxtJs), Power BI, Machine Learning, Data Mining, ETL Pipelines, NLP, Retrieval-Augmented Generation (RAG), LlamaIndex, SQL, Data Visualization

February 2021 - August 2021

MTN Côte d'Ivoire
Business Intelligence Analyst

- Designed and maintained ETL workflows using SAS for nationwide network performance monitoring and optimization.
- Developed automated reporting systems and dashboards for network performance KPIs.
- Built automated data processing pipelines using Python to streamline reporting workflows.
- Reduced monthly reporting time by 60% through ETL workflow automation.

Technologies

Python, SAS, ETL, Data Processing, KPI Reporting, Data Visualization, Automation

- Developed ML models to predict security breaches and prioritize infrastructure interventions.
- Built real-time dashboards for server monitoring, system health, and status tracking.
- Deployed and maintained analytical server infrastructure on CentOS environments.
- Improved IT infrastructure security and resilience through predictive analytics.
- Reduced downtime of critical services through proactive monitoring systems.

Technologies

Python, Machine Learning, Predictive Analytics, Cybersecurity, CentOS, Real-Time Monitoring, Data Visualization, Linux, Infrastructure Monitoring

March 2018 - June 2018

NOVUS Emergent Technology Application Developer

- Designed and developed medical software applications for desktop and Android platforms.
- Built and integrated RESTful APIs using Spring Boot for backend services and data access.
- Collaborated with healthcare professionals to gather requirements and translate them into functional software features.

Technologies

Java, Spring Boot, Android Studio (Java), RESTful APIs, Desktop Application Development

SIDE PROJECTS

Stock Market Tracking Application

- Developed a mobile application for stock market monitoring backed by AWS.
- Implemented automated market data scraping (collection) and processing pipelines.

Technologies: AWS IaaS (SAM), Python, React Native (Android + iOS), Google Cloud Console

Heavy Cargo Delivery Platform

- Developed a mobile platform connecting customers with heavy cargo delivery providers.
- Designed backend services and deployment architecture for scalable operations.

Technologies: React Native (iOS + Android), Supabase, Google Cloud Console, Google Play Console, Twilio SMS API

Movie Recommendation System

- Built a movie recommendation system with nice and ergonomic UI using Python and JQuery

EDUCATIONS

Master's Degree in Data Science, Big Data and Artificial Intelligence

- International Data Science Institute, INP-HB, Côte d'Ivoire, 2018 - 2020

Bachelor's Degree in Computer Science

- Ecole Supérieure Africaine des TIC, ESATIC, Côte d'Ivoire, 2015 - 2018

High School Diploma

- Lycée Classique d'Abidjan, Côte d'Ivoire, 2012 - 2015

SOFT SKILLS

- | | | |
|------------------|-------------------|------------------------------|
| • 3D Design | • Problem-solving | • Teamwork and collaboration |
| • Fluent English | • Creativity/Art | • Time/Project planning |
