

PROFESSIONAL SUMMARY

Versatile Software Developer and DevOps Engineer with strong expertise in building scalable applications, implementing CI/CD pipelines, and automating deployment workflows. Trained in AWS DevOps and Docker with hands-on experience in cloud infrastructure management. Passionate about automation and bridging the gap between development and operations. Proven ability to deliver robust software solutions while improving development lifecycle efficiency.

TECHNICAL SKILLS

Full-Stack Software Development (Web, React Native) | Docker & Containerization | AWS Cloud Services | CI/CD Pipelines & Automation | RESTful API Development | Linux System Administration | Version Control (Git) | Scripting & Automation

PROFESSIONAL EXPERIENCE

September 2021 - Present

Autorité de Régulation du Transport Intérieur
(Chef de Service) Head of R&D – Software & DevOps Engineering

- Developed internal business applications for mission management, and inventory tracking.
- Built data extraction agent to collect and centralize data from regulated organizations' servers.
- Automated data processing and reporting workflows using scripting and analytics tools.
- Built and maintained internal dashboards and reporting tools for operational monitoring.
- Supported deployment environments and containerized internal applications using Docker.
- Coordinated cross-functional technical teams including software, data, and DevOps engineers.

Technologies

Nuxt.js, Next.js, C#, Python, Java (Spring Boot), Sequelize, Docker, Power BI, Microsoft GraphQL

February 2021 - August 2021

MTN Côte d'Ivoire
Business Intelligence Analyst

- Automated ETL workflows for telecom network performance analysis and reporting.
- Built automation tools to streamline operational processes.
- Developed monitoring and reporting solutions for nationwide network KPI tracking.
- Automated recurring reporting tasks, reducing manual and improving operational efficiency.
- Collaborated with operational teams to support data-driven network optimization initiatives.

Technologies

R, Python, SAS, ETL Workflows, Automation Scripts, KPI Reporting

March 2020 - January 2021

Orange Côte d'Ivoire
Cybersecurity Data Scientist

- Coded internal security monitoring and analytics applications for proactive incident detection.
- Built monitoring dashboards and operational tools for real-time server health tracking.
- Deployed, configured, and maintained analytical server environments on CentOS Linux.
- Automated security-related data processing and reporting workflows using scripting tools.
- Contributed to improving infrastructure reliability through proactive monitoring and operational support solutions.

Technologies

R (Shiny), Python, CentOS Linux, Monitoring Dashboards, Automation Scripts

- Designed and developed medical software applications for desktop and Android platforms.
- Built and integrated RESTful APIs using Spring Boot for backend services and data access.
- Performed testing, debugging, and QA to improve application stability and reliability.
- Collaborated with healthcare professionals to gather requirements and translate them into functional software features.

Technologies

Java, Spring Boot, Android Studio (Java), RESTful APIs, Desktop Application Development, Testing & Debugging

SIDE PROJECTS

Stock Market Tracking Application

- Developed a mobile application for stock market monitoring.
- Built cloud backend services using Supabase and AWS.
- Implemented automated market data scraping (collection) and processing pipelines.

Technologies: AWS IaaS (SAM), Python, React Native (Android + iOS), Google Cloud Console

Heavy Cargo Delivery Platform

- Developed a mobile platform connecting customers with heavy cargo delivery providers.
- Designed backend services and deployment architecture for scalable operations.

Technologies: React Native (iOS + Android), Supabase, Google Cloud Console, Google Play Console, Twilio SMS API

Restaurant Ordering Management Application

- Built a mobile restaurant ordering and management application with cloud-hosted backend services.
- Implemented order tracking and business management functionalities.

Technologies: React Native (iOS + Android), Supabase, Google Cloud Console, Google Play Console

Movie Recommendation System

- Built a movie recommendation system with nice and ergonomic UI using Python and JQuery

EDUCATIONS

Master's Degree in Data Science, Big Data and Artificial Intelligence

- International Data Science Institute, INP-HB, Côte d'Ivoire, 2018 - 2020

Bachelor's Degree in Computer Science

- Ecole Supérieure Africaine des TIC, ESATIC, Côte d'Ivoire, 2015 - 2018

High School Diploma

- Lycée Classique d'Abidjan, Côte d'Ivoire, 2012 - 2015

SOFT SKILLS

- | | | |
|------------------|-------------------|------------------------------|
| • 3D Design | • Problem-solving | • Teamwork and collaboration |
| • Fluent English | • Creativity/Art | • Time/Project planning |
