

PROFESSIONAL SUMMARY

Experienced System Administrator and DevOps Engineer with expertise in managing Linux server infrastructure, network operations, and cloud deployments. Trained in AWS DevOps and Docker with hands-on experience in infrastructure automation, server monitoring, and security hardening. Skilled in maintaining high-availability systems and implementing infrastructure-as-code practices. Strong background in network engineering and systems optimization.

TECHNICAL SKILLS

Linux System Administration (CentOS, Ubuntu) | Docker & Container Orchestration | AWS Cloud Infrastructure | Network Engineering & Security | Server Monitoring & Maintenance | Infrastructure Automation | CI/CD Pipeline Implementation | Scripting (Python, Bash)

PROFESSIONAL EXPERIENCE

September 2021 - Present

Autorité de Régulation du Transport Intérieur
(Chef de Service) Head of R&D – System Administrator

- Manage IT infrastructure, systems administration, and network operations.
- Administer server environments, database systems, and monitoring infrastructure.
- Lead and coordinate DevOps and software engineering teams.
- Implement cloud solutions and manage application deployments.
- Support and maintain infrastructure powering national transport data systems.
- Contribute to the organization's digital transformation initiatives.

Technologies

Windows Server Data Center 2022, Linux, Docker, Wireshark, Network Administration, System Monitoring, Database Administration, DevOps, Cloud Infrastructure

February 2021 - August 2021

MTN Côte d'Ivoire
Business Intelligence Analyst

- Monitored and maintained nationwide network infrastructure performance.
- Tracked network performance KPIs across national infrastructure systems.
- Maintained ETL workflows for network data processing and analysis.
- Automated monitoring and reporting processes to improve operational efficiency.
- Supported network operations through data analysis and infrastructure monitoring.

Technologies

Linux, SQL, ETL, Python, Automation Scripting, Network Monitoring, Data Analysis

March 2020 - January 2021

Orange Côte d'Ivoire
Cybersecurity Data Scientist

- Deployed and maintained server infrastructure for cybersecurity operations.
- Administered analytical servers running on CentOS Linux environments.
- Implemented infrastructure monitoring and alerting systems for operational reliability.
- Supported infrastructure for an ML-powered security analytics platform.
- Improved service availability through proactive monitoring and system maintenance.
- Strengthened infrastructure security and operational stability.

Technologies

CentOS Linux, Server Administration, System Monitoring, Network Security, Docker, Python, Infrastructure Management

- Designed and developed medical software applications for desktop and Android platforms.
- Built and integrated RESTful APIs using Spring Boot for backend services and data access.
- Performed testing, debugging, and QA to improve application stability and reliability.
- Collaborated with healthcare professionals to gather requirements and translate them into functional software features.

Technologies

Java, Spring Boot, Android Studio (Java), RESTful APIs, Desktop Application Development, Testing & Debugging

SIDE PROJECTS

Active Directory & Endpoint Branding Deployment

- Deployed Active Directory for centralized IAM across institutional environments.
- Configured endpoint branding and managed users, groups, and policies .

Technologies: Windows Server, Active Directory, Group Policy (GPO), Endpoint Management

Regulated Data Extraction & Centralization System

- Built a data extraction system to collect and centralize data from regulated entities.
- Automated ETL pipelines for data ingestion, transformation, and consolidation.

Technologies: C#, Python, ETL Pipelines, APIs, Data Processing

AWS Cloud Deployment & Automation Platform

- Deployed applications on AWS with VPC setup, user provisioning, and API deployment.
- Implemented task scheduling and automated operational workflows in cloud environments.

Technologies: AWS (EC2, VPC, IAM, Lambda/Scheduler), Docker, Python, API Deployment, Linux

Internal Business Systems & Automation Platform

- Coded applications for mission management, inventory tracking, and reporting dashboards.
- Automated data processing and reporting workflows for operational monitoring and decision.

Technologies: Nuxt.js, Next.js, Python, Docker, Power BI, Linux, Automation Scripting

EDUCATIONS

Master's Degree in Data Science, Big Data and Artificial Intelligence

- International Data Science Institute, INP-HB, Côte d'Ivoire, 2018 - 2020

Bachelor's Degree in Computer Science

- Ecole Supérieure Africaine des TIC, ESATIC, Côte d'Ivoire, 2015 - 2018

High School Diploma

- Lycée Classique d'Abidjan, Côte d'Ivoire, 2012 - 2015

SOFT SKILLS

- | | | |
|------------------|-------------------|------------------------------|
| • 3D Design | • Problem-solving | • Teamwork and collaboration |
| • Fluent English | • Creativity/Art | • Time/Project planning |
